Sponsorship Prospectus

Greetings

We are pleased to announce that NEURO2019, the joint meeting of the 42nd Annual Meeting of the Japan Neuroscience Society and the 62nd Annual Meeting of the Japanese Society for Neurochemistry, will be held from July 25 (Thu) to 28 (Sun), 2019 at the Toki Messe Niigata Convention Center in the west coast of the main island of Japan. It has been six years since these organizations held the previous joint meeting in Kyoto in 2013.

Both societies were formed several decades ago with the aim of furthering understanding of the way the brain and nervous system function, with the Japan Neuroscience Society taking a neurophysiological approach and the Japanese Society for Neurochemistry, a neurochemical approach, and each making significant advances in their respective disciplines. Yet in recent years, studies of neural systems have increased in scope significantly, expanding beyond the traditional fields of biology, medical science and pharmaceutical science to cover the disciplines of economics, psychology, infotech, system engineering, education and chemistry as people try to use the knowledge of neuroscience to simulate trends in social behaviors and economic phenomena. Indeed, the borders that have separated realms of neuroscience and neural research are becoming increasingly murky. In light of such trends, the NEURO2019 joint meeting has been organized with the aim of bringing together a broad range of multidisciplinary fields of study.

With such impressive developments being made with modern neuroscience – such as molecular manipulation techniques for neurons and glial cells in the brain, control techniques for neural circuits, visualization methods of human brain activity, and computational neuroscience – we are gaining a better understanding of how the activities of groups of neural cells can regulate the various brain functions of “mind”, and we are elucidating the pathological mechanisms of neurological and psychiatric diseases. Under the general consensus that we, humans, have obtained these tools to reveal the fundamental ways how human brains operate, policy initiatives are taken by the governments around the world to promote further advances in brain research.

As neuroscience and neurochemical research continue to expand on a global scale, the Japan Neuroscience Society and the Japanese Society for Neurochemistry have organized NEURO2019 as a joint meeting with the theme of “Brain Science Takes Flight: Bridging the Mind and Life,” by focusing on the most recent developments in modern neuroscience and providing an avenue to discuss potential future developments. To achieve this goal, NEURO2019 will invite internationally distinguished researchers for plenary lectures and leading Japanese neuroscientists for special lectures, and medical education programs will also be implemented. An additional focus has been placed on training of young researchers, with the program such as oral presentations of young researchers, education-related seminars, and young scientist seminars. Thus, the Neuro2019 program will provide an extensive range of learning and discussion opportunities covering fundamental knowledge through to advanced fields catering to trainees through to graduate school students and researchers.

We would like to take this opportunity to provide the additional information below as We ask for your company’s cooperation and support for NEURO2019. We are looking forward to welcoming a large number of participants at the joint meeting. In closing, We offer my hopes for the continued growth and prosperity of your company.

Sincerely,

42nd Annual Meeting of the Japan Neuroscience Society
President Hitoshi Okamoto

62nd Annual Meeting of the Japanese Society for Neurochemistry
President Hiroyuki Nawa

Meeting Outline

- Title Joint conference of The 42nd Annual Meeting of the Japan Neuroscience Society and The 62nd Annual Meeting of the Japanese Society for Neurochemistry (Neuro2019)
- Theme Brain Science Takes Flight : Bridging the Mind and Life
- Date July 25 (Thu) – 28 (Sun), 2019
*The conference is scheduled to finish at 1:30pm and only educational lectures, symposia, and oral presentations are planned to be held on Day 4(July 28). Poster presentations, exhibition, and luncheon seminars are not programmed.
- Venue TOKI MESSE – Niigata Convention Center
- Purpose and Significance With such impressive developments being made with modern neuroscience – such as molecular manipulation techniques for neurons and glial cells in the brain, manipulation techniques for neural circuits, visualization methods of human brain activity, and computational neuroscience – we have been able to gain a better understanding of how the activities of groups of neural cells in the brain can be attributed to various functions of mind, and we have even been able to identify the pathological mechanisms of neurological and psychiatric diseases and use these findings for developing a way to treat them. Based on the consensus that we have obtained enough tools to reveal the fundamental way brains operate, many countries around the world are now taking the initiative to promote further advances in brain research.
Under such situations where Neuroscience and neurochemical research continue to expand on a global scale, the Japan Neuroscience Society and the Japanese Society for Neurochemistry have organized this joint meeting with the aim of promoting quantal leaps in neuroscience and neurochemistry research that extend beyond the traditional boundaries of such fields. To achieve this goal, the world’s leading researchers from a range of disciplines will present plenary lectures and special lectures, and symposiums and educational forums will be held to provide participants with a greater scope of the latest knowhow and advances, and facilitate communications among the researchers across research disciplines. A truly diverse program is being organized to run from early morning until late in the evening with the goal of boosting the level of “knowledge, technical prowess and interaction,” particularly for young trainees and those just starting out in the field of neuroscience.
- Program Plenary Lectures
Special Lectures
Symposia
Educational Lectures
Award Lectures
Oral / Poster Presentations
Luncheon Seminars
Exhibition
- Expected number of participants approx. 3,000

- Notes
- Equipment

Seminar fee provides standard audio-visual equipment for seminar (projector, screen, microphone, etc.) and staff for video, audio, and lighting. **Also, one meeting badge is to be provided for free access to programs at the venue.** If any other equipment, such as video recording or tape recording is required, charges will be incurred separately. Please contact the secretariat for the details.
- Program

Program will be organized by the executive committee and informed to the seminar hosts from the secretariat.
- Seminar fees do not include the following items and options. Actual cost will be charged as option expenses by the secretariat after the meeting.

- Box lunch for participants (with drink)

Please arrange lunch box as seminars will be held during lunchtime.

The secretariat will confirm a quantity of box lunch with each seminar host after the application deadline, and handle the orders.

Price of box lunch with drink (tentative): JPY1,300 / box.

- Options

1. Personnel expense: operational staff (announcement, timekeeping, distribution of materials and lunch, guide)

*They will be arranged separately from staff assigned to other program.

2. Honorarium and travel expenses for speakers and chairs

3. Signboard and display at the entrance of seminar room, etc.

4. Additional equipment: video recording / tape recording / simultaneous interpretation / equipment for anteroom, etc.

5. Anteroom: room charge, food and drink

6. Agent service fee

*If you order above options, 10% of agent service fee will be added to the total amount of option fees.

- **Advance reservation system** will be available online for the luncheon seminars of Neuro2019. The information of participants who made a reservation will be provided to each seminar host. The schedule and procedure will be notified from the secretariat after the application.

- Booth allocation
Booths will be allocated upon due consideration of kinds of exhibits, shapes, weight, a number of booths, etc. after the application deadline and a layout will be sent with a confirmation notice. No booth allocation meeting will be held.
*Please let us know if you have any requests until the application deadline.
(ex. To allocate booths side-by-side with group companies or business partners.)
- Display table
In case you do not need display tables and place exhibits directly on the floor, please specify the number of unnecessary table on the application system.
Also, please tick the specified section if you are planning your own special decorations for your booths.
- Exhibits control
Please be reminded that all exhibits are under exhibitors' control, and we are not responsible for any losses, thefts, fire or damages by an inevitable accident during the exhibition.
- Others
Distributing flyers, catalogues or samples apart from your booth during the exhibition is not permitted. Since many companies are expected to participate in the exhibition, your cooperation would be highly appreciated.
However, there will be some exceptions of an extra fee option to distribute or with permission from the organization committee.
- Contributions
A part of exhibition fee will be used for arranging "Stamp rally"(Prizes etc.) which is to be held at the exhibition site. If you are interested in cosponsoring prizes, please contact the secretariat.
